

Northern LightSM

Eastern Maine Medical Center

Gastroenterology

Comprehensive digestive care

We provide comprehensive digestive disease care for adult patients and offer a full spectrum of services from basic screening colonoscopy to more advanced procedures. Our dedicated professionals keep abreast of the latest GI technology and medicine, and work closely with the divisions of infectious diseases, hematology, oncology, surgery, and primary care providers. In our ongoing efforts to make healthcare work for Mainers, we're also pleased to offer Telehealth services whenever possible so patients can remain close to home and still receive world-class GI care.

Advanced procedures:

In addition to all general gastroenterology services, we offer the following specialized therapies:

- Capsule endoscopy
- Endoscopic mucosal resection (EMR)
- Endoscopic retrograde holangiopancreatography (ERCP)
- Endoscopic ultrasonography (EUS)
- Motility studies including esophageal manometry, pH probe, anorectal manometry, and SmartPill®
- Radiofrequency ablation (RFA)
