Stakeholder Survey Qualitative Input

A survey of 1,639 health professionals and community stakeholders across Maine provided insight into the most critical health issues and determinants impacting the lives of those living in Maine. According to these stakeholders, the following five health issues and health factors have the most impact on the state resulting in poor health outcomes for residents.

**Top five health issues:**
- Drug & Alcohol Abuse
- Obesity
- Mental Health
- Physical Activity & Nutrition
- Depression

**Top five health factors:**
- Poverty
- Access to Behavioral/Mental Health Care
- Transportation
- Health Care Insurance
- Employment
