Vaccinations worldwide

The screenshot shows the 'Our World in Data' website. The header includes the site name, a search bar, and navigation links for 'Articles by topic', 'Latest', 'About', and 'Donate'. Logos for 'OXFORD MARTIN SCHOOL', 'UNIVERSITY OF OXFORD', and 'GCDL' are also present. The main content area is titled 'Statistics and Research' and features a large heading 'Coronavirus (COVID-19) Vaccinations'. Below this, a breadcrumb trail reads 'Home > Coronavirus > Vaccinations'. Three key statistics are highlighted: 49.3% of the world population has received at least one dose of a COVID-19 vaccine; 7 billion doses have been administered globally, with 24.08 million administered each day; and only 3.5% of people in low-income countries have received at least one dose.

Statistics and Research

Coronavirus (COVID-19) Vaccinations

[Home](#) > [Coronavirus](#) > Vaccinations

49.3% of the world population has received at least one dose of a COVID-19 vaccine.

7 billion doses have been administered globally, and **24.08 million** are now administered each day.

Only **3.5%** of people in low-income countries have received at least one dose.

Vaccines for children ages 5-11

- **Oct. 29, 2021** – study of 4,500 children in clinical trials
 - FDA approved Pfizer at 1/3 adult dose
 - Two doses, three weeks apart
 - >90% efficacy
- Younger children more robust immunologic response than adolescents and adults
- **Nov. 2, 2021** – US CDC/ACIP approval
 - Distribution of vaccines underway across Maine
- **Nov. 11, 2021 – target date** - Northern Light Health widespread vaccination availability and Online appointments [COVID-19 \(Coronavirus\) Portal - Public Vaccination \(northernlighthealth.org\)](https://www.northernlighthealth.org/covid-19/public-vaccination)
- Moderna clinical trials being evaluated

<https://www.yalemedicine.org/news/covid-vaccine-for-ages-5-to-11>

Boosters – eligibility, mix and match

- Janssen (J&J) COVID-19 Vaccine recipients 18 years of age and older may receive a single booster dose of Janssen COVID-19 Vaccine, Moderna COVID-19 Vaccine (half dose) or Pfizer-BioNTech COVID-19 Vaccine at least two months after receiving their Janssen COVID-19 Vaccine primary vaccination.
- Moderna COVID-19 Vaccine and Pfizer-BioNTech COVID-19 vaccine recipients falling into one of the authorized categories for boosters (65 years of age and older, 18 through 64 years of age at high-risk of severe COVID-19, and 18 through 64 years of age with frequent institutional or occupational exposure to SARS-CoV-2) may receive a booster dose of Moderna COVID-19 Vaccine (half dose), Pfizer-BioNTech COVID-19 Vaccine or Janssen COVID-19 Vaccine at least six months after completing their primary vaccination.

<https://www.fda.gov/news-events/press-announcements/coronavirus-covid-19-update-fda-takes-additional-actions-use-booster-dose-covid-19-vaccines>

The bottom line

- The relative risks from vaccinations are very small.
- The relative risks from not getting vaccinated are large.
- The global strategy to end this pandemic is to achieve immunity via vaccinations.
- This virus is a biological superstar ... not to be underestimated.
