

In addition to medication management, Adult Outpatient Services also provides: individual therapy, couples counseling, family therapy, and group therapy.

Clients can request from current providers a referral for groups, some may have a waitlist

Unless otherwise identified, all therapy groups in Adult Outpatient Services —

- Are for adult men and women
- Have a “rolling admission” (group members can start any time)
- Are “open ended” (group members can stay as long as it is therapeutically appropriate)
- Are held once per week
- Can be billed to most insurances

Friday

1 – 2:30 pm Grief, Loss, and Healing

This outpatient group will guide patients to explore their unique grieving process and offer and assist in building peer support as well as developing skills to rebuild their lives. The group therapy dynamics include the permission to grieve openly, gaining a sense of belonging and knowing that you are not alone, exploring ways of honoring your loved one.

2 – 3 pm Writing Group

A referral group that uses writing prompts to encourage creative expression to foster awareness and reflection.

If you are currently a patient in Ambulatory services here at Acadia Hospital, please let your nurse, clinician, and/or psychiatrist know that you are interested in learning more about individual, couples, family or therapy groups.
