

**Testing Schedule/Result Availability for Tests Not Performed Daily (Subject to change during holiday weeks)**

<b>COAGULATION</b>	
<b>TEST</b>	<b>TESTING SCHEDULE/RESULT AVAILABILITY</b>
Hypercoagulable Panel Basic	W (Comprehensive Panel within two weeks)
Lupus Anticoagulant Panel	W
PF4 for HIT	Sun - F
Platelet Aggregation/vonWillebrand Panel	W
Ristocetin Cofactor (vonWillebrand Factor Activity)	W
Sickle Cell	M, W, F
<b>GENERAL LABORATORY</b>	
ANA	M-F
DHEA-Sulfate	T, F
Free PSA	T, F
Hepatitis Tests (HBV, HAV, HCV)	M-F
Immunofixation Electrophoresis (serum, urine)	M-F (reported within 72 hours)
Insulin	T, F
Myoglobin	M- F (available STAT)
Protein Electrophoresis Testing (serum, urine)	M-F (reported within 72 hours)
Referral Test	2 days or more (sent to off-site laboratory)
Thyroglobulin Antibody	T, F
Thyroid Peroxidase (TPO) Antibody	T, F
Vitamin D (25 hydroxy)	M – F
<b>MICROBIOLOGY</b>	
AFB	Cultures held 6 weeks
Anticardiolipin IgG and IgM	M
BP PCR (B. pertussis)	M, W, F (more frequently during outbreaks)
Bacterial Culture and Sensitivity	Clinically significant information is often available within 24 hours. Final results vary with culture types.
Celiac TTG Panel	M, W, F
EBV Antibodies	T, F
FAC2PCR (Factor II)	T
FAC5PCR (Factor V)	T
HCV RNA Quantitative	W
HIV Antibody	M, W, F
HIV Q PCR	W
H.pylori Antibody	T, Th
HSV PCR (non-CSF)	M, W, F
HSV SER (Type 1 & 2 Serology)	T, F
Lyme IgG/IgM Antibody Screen (reflexed to WB if positive)	M,W, F (daily during peak season)
Mumps IgG Immune Status	M, W, F
Rubella IgG Immune Status	M,W, F
Rubeola IgG Immune Status	M,W, F
TTG-A and TTG-G	M, W, F
Varicella Zoster IgG Immune Status	M, W, F
VZV PCR (non-CSF)	M, W, F
<b>TOXICOLOGY</b>	
Clozapine	W, F
Cyclosporine	M – F
Methylphenidate Confirmation	T, Th
Tacrolimus	M – F
Urine Opiate Confirmation	M – F
Urine Benzodiazepines Confirmation	M, W, F
