AROOSTOOK Career Exploration

Career Awareness
Career Exploration
Career Development

“Students will get a real feel for whether or not the careers they are exploring are right for them and get the chance to network with professionals who work in these careers every day. They will see the technology being used, hear about emerging trends, and learn what it takes to get into college in that specific career.”

Daryl Boucher
VP of Operations

Plan for your future.

Career Exploration Reboot

You may have heard of our Survivor Camp, a one-week health careers exploration program. Maybe you had an older brother or sister who attended. Well, we have changed things up and are offering a more in-depth experience for local high school students!

Instead of a one-time experience after you finish junior high, our Aroostook Career Exploration program offers on-going experiences throughout your high school career. Sessions will be offered throughout each academic year, with learning experiences evolving as you get older and closer to college and the job market.

You complete as many or as few sessions as your schedule and interests allow.

Greater Benefits for You

- You have more time to explore a wider field of career opportunities.
- You will be able to take part in volunteer and job shadow opportunities to expand your knowledge in areas of interest.
- You will will earn your CPR/First Aid certification.
- You will get assistance with college and career readiness preparation.
- You have flexibility within the program regarding what sessions you take part in.
- If you successfully complete the program, you will be eligible for a college scholarship.

To learn more about this program or to download a registration form, you can:

1. Go to: northernlighthhealth.org/ace and click on the link at the bottom of the page.
2. Visit us on Facebook: Survivor Aroostook Health Careers Exploration Camp
3. Call and ask us about the program or request material be mailed to you: 207.768.4172.

Exploring careers takes more than research.

Nothing beats personal, hands-on experiences.
